

Super-Energize Your Aging Cells With The TeslasPEMF System

PEMF therapy is FDA approved for bone regeneration, pain, headaches, sports medicine, post-surgery, physical therapy, brain cancer, Regenerative Medicine, and neurological disorders such as depression. For over 70 years PEMF has been used and studied by professionals. More than 20,000 studies have been published and PEMF is now recognized and regulated worldwide as a verified health technique.

TeslasPEMF / MDA LLC, is the leading PEMF machine supplier in the U.S. We offer the TeslasPEMF system with versatile frequency options to ensure the right cellular energizing frequency for you. Would you like to try PEMF therapy for yourself? Make sure to take advantage of our big discount offer now.

PEMF devices are very helpful in addressing bone problems and in cleaning and stimulating the mitochondria energy batteries in cells. Soon everyone will discover it for a multitude of health issues.

What is PEMF therapy?

PEMF therapy is an extremely versatile cellular energizing modality that gives your body's mitochondria batteries the energy needed to function optimally. It involves the use of low-frequency electromagnetic waves to stimulate and energize cells in the body. The treatment also improves sleep, mental focus, and the body's overall performance. In addition, it helps the aging body's natural recovery process to function much more effectively.

Although the use of PEMF therapy has gained popularity only in recent years, the concept of electromagnetic therapy has been around for centuries.

In 2003, NASA published studies to support the use of electromagnetic waves. Astronauts in space experienced bone loss and muscle atrophy because of the absence of gravity. In response to that, Dr. Goodwin conducted a four-year study to determine if PEMF therapy could help. The study found that cells exposed to PEMF regenerated 2.5-4.0 times faster than the body's cells that were not exposed to PEMF. As a result, magnetic field generators are now commonly used in spacecraft to help simulate and encourage the healing effects of Earth's electromagnetic field.

Now there have been a multiple of medical studies supporting the efficacy of the PEMF exposure. Studies show PEMF to effectively treat bone fractures, low back pain, knee osteoarthritis, and many other health conditions. **TeslasPEMF's strength – it's the best cellular Energizing/Cleansing tool.**

How does PEMF therapy work?

To understand how PEMF therapy works, it's important to know how the cells in your body function. Cells are the building blocks of the human body. They perform a wide range of functions, from energy production and metabolism to immune defense and communication with other cells.

Cells communicate with one another through electrical impulses generated by the movement of charged ions across their cell membranes. Disruptions in this electrical activity can lead to various destructive health problems.

TeslasPEMF usage modulates the electrical activity of cells in the body by using certain frequencies and intensities of safe electromagnetic waves. These magnetic energy waves interact with your body's natural magnetic field to enhance electrolytes and ions while improving the healing process. This naturally enhances the body's cellular metabolism and healthy electrical changes at the cellular level.

The PEMF usage aims to enhance cellular communication and signaling, promote tissue repair and **regeneration**, and maintain optimal health and well-being by directing targeted electromagnetic fields to specific parts of the body.

PEMF therapy also improves the body's [ability to produce nitric oxide](#). Nitric oxide release is a common healing process following injuries and may assist in a profound inflammation reduction. Thus, the usage works with your body's own recovery processes to treat acute and chronic pain.

How to choose the right PEMF therapy machine?

1 - Frequency range

PEMF machines emit electromagnetic frequencies at different levels. Look for a machine that has a wide frequency range, as this will allow you to target a multitude of various health conditions.

2 - Intensity

The intensity of a PEMF machine refers to the strength of the electromagnetic field it produces, which is measured in gauss or tesla. The ideal intensity depends on the condition for which you are using the device and your body's sensitivity to that usage. Typically, patients with severe conditions, intense chronic pain, and serious injuries require high intensity. Low-intensity machines are often used at home and need to be used more frequently. We have two systems which both work a high and low intensity.

3 - Food and Drug Administration (FDA) approval:

You may wish to purchase products that have FDA approval to ensure that the machine is safe and effective for its intended use. FDA has approved PEMF for Brain Cancer, bone regeneration and more.

4 - Quality of construction

Look for a PEMF machine that is well constructed and made of durable materials. This ensures that it will last for a long period and provide consistent results.

5 - User-friendly features

Look for a machine that is easy to use and has user-friendly features such as preprogrammed settings and clear instructions. The TeslasPEMF system has over 2,500 safe and effective healing frequencies.

6 - Medical condition

Specific machines are designed to target specific regions of the body. Be certain that the machine you select is appropriate for the condition you want to treat. TeslasPEMF Machine has over 8 yrs of proof.

Why is TeslasPEMF the best PEMF healing device?

TeslasPEMF is the most powerful PEMF machine in today's market and was featured in Medical News Today for Best frequency ranges. Most PEMF devices on the market today offer only a limited frequency range of 1-50 Hz. TeslasPEMF stands out by providing a wide frequency range 7-10,000 Hz

The wide range of frequencies allows for even more precise and targeted treatment, giving you the power to take control of your health and well-being like never before.

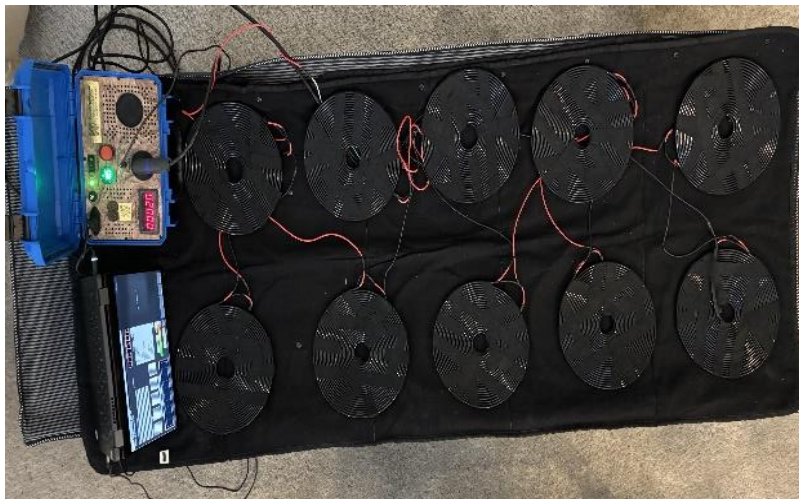

TESLASPEMF supports all waveforms. PEMF Devices produce either a square, a sawtooth, a sine, a trapezoidal, or a custom waveform. It also has a superior dual coil system as well as a magnificent

sleeping and long-term energizing system of the Portable 10 Coil Sleeping Mat. Both support the needed high and low frequencies useful for almost all health conditions. Remember, when cells are energized, and the cell surfaces are cleansed, they themselves. It is not the machine by itself that heals.

From usage learn the value of buying an affordable stationary 2 Coil System or a portable 10 Coil TeslasPEMF Mat System for your personal or business usage. Stop visiting chiropractor's or physiotherapist's offices. Get relief from any ailments anywhere, anytime with a TeslasPEMF System!

Why Choose TeslasPEMF over Low-Power PEMF machines?

- 1) TeslasPEMF Machine is 1,000 times stronger than the Bemer & other PEMF Machines that can almost always only offer the 7hz to 50 hz frequencies.
- 2) TeslasPEMF delivers Micro Currents which charges your up to 100 trillion cells' mitochondria effectively through thousands of Bio-photon frequencies.
- 3) TeslasPEMF uses a 50/50 Regenerative power & frequency system not a single pounding narrow one to five PEMF frequency current which often only moves the muscles up & down.
- 4) TeslasPEMF used the Professional Helmholtz Coil used by hospitals and clinics to deliver real health measuring and producing results. Don't settle for a bouncing muscle machine that only tells you that the machine is actually working – The narrow low 1 to 5 frequency PEMF machines for pounding on the body for long periods have been shown to hurt not energize the body's cells.

Enjoy the Healing High Power of the 10 Coil System Above with both High & Low Power Sleeping Mat settings that “Help the Body To Heal Itself” by energizing the Mitochondria in all of the up to 100 Trillion cells in the body that age like deadened flashlight batteries after time.

“Energy Creates Health & Longevity!”
